

REGISTRAT-MAPI has one of the most experienced clinical teams devoted exclusively to Late Phase studies.

Our Clinical Services group provides the clinical experience and expertise to design and implement Late Phase studies, registries, post-marketing safety surveillance studies, and Risk Management programs for our Clients. The Sponsor's clinical and commercial objectives are carefully considered and incorporated into the overall strategic design of the study.

The Clinical Services group provides:

- Strategic design of Late Phase studies and Risk Management programs
- Management of study start-up activities
- Development of study reference manuals and other study materials
- Investigator and Study Coordinator training
- On-site clinical monitoring
- Site relationship management, which includes:
 - Integral support through the multi-tiered Call Center
 - Liaison with participants and field personnel for the study
 - Monitoring site and patient enrollment
 - Clarifying processes and logistical procedures
 - Responding to questions regarding completion of CRFs, interpretation of data reports, etc.
 - Disseminating study materials
 - Helping to resolve data queries
